

**ENVIRONMENTAL AUDIT OF QUEENS HARBOUR MASTER (QHM)
& CANADIAN FORCES NAVAL OPERATIONS SCHOOL (CFNOS)
CFB HALIFAX, HALIFAX, NS, CANADA**

OCL Group was retained to assess the status of environmental management system (EMS) being implemented by Queen's Harbour Master (QHM) and the Canadian Forces Naval Operation School (CFNOS). These Units had not identified their aspects and impacts nor were Standard Operating Procedures (SOP's) in place.

The project entailed Unit audits for activities; identification and scoring of significant environmental activities and impacts; and development of SOP's for all activities identified as significant. This project required an in-depth knowledge of ISO 14000, EMS development, EMS auditing and significant knowledge of DND procedures/operations and chain of command.

Client: Dept. of National Defence
