

## **INDOOR AIR QUALITY ASSESSMENT AND REMEDIATION COURT OF QUEEN'S BENCH AND PROVINCIAL COURT MONCTON, NEW BRUNSWICK**

**OCL Group** was retained to conduct an in-depth assessment of two floors of an office complex. Facilities include Court of Queen's Bench (four courts) and Provincial Court (3 courts), and associated offices and facilities serving southeastern New Brunswick and located in Moncton.

Scope included standard air quality parameters, but mould became primary focus. Combination of internal water damage to documents and water ingress around windows and concrete panels were identified as sources. Remedial plan developed to address mould contamination. Monitoring was conducted during and after remediation to ensure RAP objectives were met.

*Client: NB Dept. of Supply and Services on behalf of Dept. of Justice.*
