

## **ENVIRONMENTAL SITE ASSESSMENT AND REMEDIATION SCOTIA LIQUI-COAL PROPERTIES, HALIFAX, N.S., CANADA**

**OCL Group** was retained to conduct Phase 1 and 2 Environmental Site Assessments of facilities and operations of a former oil and coal mixtures research facility. Wastes included drums in a field and large containers inside and outside a building. Using the information, a Phase 4 Remedial Action Plan was prepared and approval obtained. Part of the Action Plan included dealing with numerous drums and containers of hazardous wastes. All wastes were properly disposed of and the site remediated suitable for sale as commercial property.
