

“INDOOR AIR QUALITY” TRAINING COURSE PRINCE EDWARD ISLAND

In response to increasing incidents of indoor air quality and occupational health & safety issues in Prince Edward Island, the Dept. of Transportation and Public Works and the Dept. of Health organized a 1-day workshop for facility managers and inspectors from various nursing homes, school boards, and hospitals. The workshop was held in Charlottetown, PEI. **OCL Group** prepared and delivered presentations on IAQ issues, including mould, comfort indices and volatile organic compounds.
